
Mauna Loa Solar Observatory Observer's Log

Tue Aug 6 16:48:22 GMT 1996

Year: 96 Doy: 219

Observer: koon

WEATHER COMMENT: Tue Aug 6 16:48:49 GMT 1996

Medium to thick cirrostratus preventing Spar from tracking properly,
wind=5 mph from the SSE, temp=46 F.

WEATHER COMMENT: Tue Aug 6 20:54:26 GMT 1996

Now orographic clouds have moved in to join the cirrostratus, observing is very
unlikely for the rest of the day.

WEATHER COMMENT: Tue Aug 6 21:32:46 GMT 1996

Starting to rain now.

Tue Aug 6 23:13:08 GMT 1996 CHIP ending tape
