MKIII COMMENT: Fri Sep 6 19:36:47 GMT 1996

After running many tests with and without the NOAA computer on and with and without the power strip plugged in I've come to the conclusion that there is no additional noise induced on the data by the NOAA computer and all else that is plugged into that power strip. I will leave their computer on and notify them. I'll also keep on the lookout for future noise problems.
