Year: 96 Doy: 364

Observer: yasukawa

WEATHER COMMENT: Sun Dec 29 17:21:22 GMT 1996

Continued cirrus overcast and strong west wind blowing around 40mph.

COMMENT: Sun Dec 29 17:22:36 GMT 1996

We may have problem with observations for the next few days. GSA car has broken a shock. Darryl and I both plan time off for the holiday and a replacement rental may or may not be available. We will try our best to remain operational.
