WEATHER COMMENT: Fri Mar 21 18:09:42 GMT 1997

Thick cirrostratus, no wind, temp=38 F. Observing unlikely for today.

COMMENT: Fri Mar 21 18:37:39 GMT 1997

I read the HELCO meters this morning. Brought up all machines that are normally left on but were turned off yesterday due to the powerline work, everything seems to work OK.
