Year: 97 Doy: 083

Observer: yasukawa

WEATHER COMMENT: Mon Mar 24 16:46:53 GMT 1997

West wind. Continued heavy cirrus and altocumulus overcast, heavy low clouds. Ground very wet.

COMMENT: Mon Mar 24 18:00:55 GMT 1997

Removed old CDROM drive and installed new one in PC. Had to modify mounts a bit to get cables to reach hard drive and CDROM.

COMMENT: Mon Mar 24 18:31:16 GMT 1997

PC recognizes CDROM drive after installation of software.

COMMENT: Mon Mar 24 19:03:01 GMT 1997

Antivirus stuff must be in command.com because that's the only thing left on the disk and that caused virus alert just after format of hard drive.

Windows95 setup stopped same place as with floppies.

COMMENT: Mon Mar 24 20:18:46 GMT 1997

I found the antivirus protection switch and disabled it. Windows 95 installation is now proceeding.

COMMENT: Mon Mar 24 21:25:01 GMT 1997

Win95 installation complete. Need to setup network next.

I asked DAK to bring up networking info, also copy of ftp and telnet programs.

COMMENT: Mon Mar 24 22:00:09 GMT 1997

No observations. In clouds all morning.
