COMMENT: Mon May 12 17:20:19 GMT 1997

I'm unable to get through to puu or hao, problem appears to be at those computers since all the local and some other mainland hosts are accessible.

COMMENT: Mon May 12 17:52:54 GMT 1997

Able to get through to puu now.

CHIP COMMENT: Mon May 12 20:15:19 GMT 1997

Stalled with Optics:Busy, before I extended the dome slot, fixed by doing a Kill/Run cycle.

MKIII COMMENT: Mon May 12 20:52:29 GMT 1997

Screen was locked-up, had to type in "programmer does forget task" at the printer/terminal to unlock it. Then I noticed that the barrel wasn't rotating, not sure how long but the last scan shown in scan-log was at 2026 ut. Coronal scans look very noisy although "Loaf-of-Bread" looks OK. Tried checking if tiltplate was partially in, it wasn't, tried ALLFRESH to refresh the corrector values in case they were corrupted, that didn't help.

MKIII COMMENT: Mon May 12 21:25:19 GMT 1997

Tried a new Setup but the scans still look unusually noisy. Will try rebooting the DEC computer and start up again from scratch with a new tape.

MKIII COMMENT: Mon May 12 21:37:19 GMT 1997

Reboot didn't help. I guess the sky is really that noisy, it looks kind of bright but not dusty or buggy. Will stop observations since they are useless.

LOW-L COMMENT: Mon May 12 21:39:25 GMT 1997

Changed the MOF setpoint from 94.0 to 95.0 at Steve's request.
