Not sure what was differnt about how I started up, but xterm icon was gone, I usually pull it down to lower left corner before typing Run command. Brought up another xterm icon from menu.

Civil Defense indicates that there is a power outage in the Hilo and Puna areas, apparently may be the cause of the higher than normal voltage seen here.

MKIII COMMENT: Mon Jun 30 20:55:02 GMT 1997

Al narrowed the problem to either the memory, again, and/or the RL controller. There was also a side problem with the RL02 unit 0 having a flaky motor speed controller so he checked out the spare RL02 drive and swapped out the bad one. There are more parts needed so he will be back on Wednesday or Thursday depending on where the

parts are sourced from.
