WEATHER COMMENT: Tue Jul 29 17:08:02 GMT 1997

Lots of cirrus moving over.

MKIII COMMENT: Tue Jul 29 17:32:19 GMT 1997

Pausing due to cirrus, so far no data on this tape.

COMMENT: Tue Jul 29 23:49:17 GMT 1997

Activity report:

QP: 121; 197; 220.

No coronal activity.

TAPES:

MKIII: No data, cirrus clouds.

DPMON: P00956, questionable data.

CHIP: C00374

LOWL: L00467 and L00468 in drive #0. NOTE: I forgot to add this earlier, the program crashed at 2216 ut with 44 files on tape (supposedly). There are multiple-exposure type images all over the bottom half of the screen and what looks like a black and white bar-code symbol at the bottom right of the screen. The upper left box that usually shows the suns location is a black empty box with a green grid pattern over it. Removed L00467 and installed L00468 in drive #0 and L00469 in drive #1, rebooted the computer.
