WEATHER COMMENT: Mon Sep 8 18:56:23 GMT 1997

Wind is upslope and Contractors below are occasionally revving up their diesel loaders and cranes and moving gravel, sand and dirt around.

This is causing sector wipeouts in the coronal scans once in a while.

CHIP COMMENT: Mon Sep 8 21:31:37 GMT 1997

CHIP computer, kii, mysteriously crashed.

Kim and David visiting, perhaps it had something to do with our presence? Shutting down for the day anyway.

Very interesting event in Southwest. Looked like 1800-2000 there was an eruptive event headed wnw of the AR.

There was also an active prominence in the AR north and a little west.

COMMENT: Mon Sep 8 21:51:33 GMT 1997

Ending obs to work on configuring observatory.
