Year: 97 Doy: 289

Observer: koon

Thu Oct 16 16:50:55 GMT 1997 MKIII Start Patrol

WEATHER COMMENT: Thu Oct 16 16:52:23 GMT 1997

Clear sky, wind=15 mph from the SSE, temp=46 F.

MKIII COMMENT: Thu Oct 16 16:52:51 GMT 1997

Using the other DX tape drive to determine whether the first one was bad.

COMMENT: Thu Oct 16 17:06:38 GMT 1997

Network wont get past the Server in Hilo.

COMMENT: Thu Oct 16 17:09:15 GMT 1997

Our 935-0533 line is finally back to normal, and once again it has Touch Tone service even though the Phone Company says we aren't paying for it, I think I'll let this mistake slide.

COMMENT: Thu Oct 16 17:46:50 GMT 1997

Wow! That new modem is great! It connected at 19.2 kbaud and was much faster than the network connection ever was. I think we need to figure out how to keep the FAX machine and the modem both hooked up to the phone line.

LOW-L COMMENT: Thu Oct 16 17:59:13 GMT 1997

L00477 popped out of drive #1 as it should have, removed it, cleaned the drive, and installed L00479.

Thu Oct 16 20:36:18 GMT 1997 PICS End Patrol

PICS COMMENT: Thu Oct 16 20:37:13 GMT 1997

Paused Patrol so David could put back the centering routine.

MKIII COMMENT: Thu Oct 16 20:41:48 GMT 1997

So far the tape drive appears to be writing OK with the exception of occasional "Tape write error 0" messages in the Akamai window. I mentioned those messages to David and he said it means that occasionally the tape drive isn't writing data. But regardless of those messages the data are mostly going to tape.

PICS COMMENT: Thu Oct 16 20:50:22 GMT 1997

Getting doubled disk images again now that the centering routine is back.

Thu Oct 16 21:02:11 GMT 1997 PICS Flat

Thu Oct 16 21:03:08 GMT 1997 PICS End Flat

COMMENT: Thu Oct 16 21:45:16 GMT 1997

Lost spar tracking a few times, repointed and it tracked again.

1997 PICS End Flat

Thu Oct 16 22:14:43 GMT 1997 PICS End Patrol

MKIII COMMENT: Thu Oct 16 22:17:25 GMT 1997

The tape drive seemed to write well throughout the day with the exception of those occasional tape write error messages that I mentioned earlier.

After doing End Day the tape didn't get popped out of the drive like it was doing on the spare tape drive.

MKIII COMMENT: I wasn't able to tar those files in the Yesterday directory to tape for Alice due to some kind of write error. David wasn't around so I sent him some screen printouts to check.
