
Mauna Loa Solar Observatory Observer's Log

Sat Nov 8 17:09:55 GMT 1997

Year: 97 Doy: 312

Observer: koon

WEATHER COMMENT: Sat Nov 8 17:10:01 GMT 1997

Thin to medium cirrostratus, wet outside although not foggy at the moment there are thick low clouds to the West, wind=5 mph from the SW, temp=43 F.

LOW-L COMMENT: Sat Nov 8 18:06:43 GMT 1997

Data stopped going to L00481 in drive #1 although it should have received at least two more days worth. Although data were going to L00482 in drive #0, L00481 didn't pop out of drive #1. I removed L00481 and installed L00483 in drive #1. The cleaning LEDs are blinking on drive #0.

WEATHER COMMENT: Sat Nov 8 18:14:06 GMT 1997

Thick altocumulus clouds are starting to pass over from the West.

WEATHER COMMENT: Sat Nov 8 21:20:30 GMT 1997

The weather has improved quite a bit, there is still a halo around the sun due to very thin cirrostratus and it is preventing MKIII observations.

But if this trend continues I should be able to get some MKIII data tomorrow.
