CHIP COMMENT: Wed Nov 12 19:59:30 GMT 1997

I put together all the parts that need to be assembled in order to remount the repaired filter that came in yesterday. I put a heat rejection filter at the front of the CHIP filter and pointed it at the sun while looking for bubbles, I couldn't find any bubbles, so far so good. Next I will install the filter and temperature controller on the Spar.

Finished installing the filter and cables, closed up instrument and turned on the filter temperature controller, also balanced the Spar coarsely but will have to fine tune it later. Will continue tomorrow by doing the intensity, spectrum, and focus testing.
