Year: 97 Doy: 333

Observer: koon

WEATHER COMMENT: Sat Nov 29 17:01:11 GMT 1997

Foggy, very rainy down the road, wind =5 mph from the SE, temp=35 F.

PICS COMMENT: Sat Nov 29 17:04:11 GMT 1997

I'll work on the PICS optical stage translation problem while I wait to see if the weather will clear up.

PICS COMMENT: Sat Nov 29 18:54:01 GMT 1997

Finished work on the optical stage. I replaced the small setscrew with a cap screw and used some liquid retaining compound to fix the stage leadscrew drive sprocket to the leadscrew so it won't slip any more. I left the covers open in case the compound gives off fumes that may be harmful to the optics, and so I can test the stage later.

WEATHER COMMENT: Sat Nov 29 18:57:22 GMT 1997

Fog is still blowing over, probably won't observe today.

COMMENT: Sat Nov 29 19:17:13 GMT 1997

Heading down to Hilo to take the GSA car into the shop, again, hopefully for the last time.
