PSPT COMMENT: Sat Mar 14 18:08:40 GMT 1998

I'm not sure what the status of the instrument is, a side panel is removed from the telescope and the normal program directory isn't up on the sparcstation. A previous log mentions that some optics cleaning and possibly a motor swap was being done. I'll play it safe and wait for the guys to get here before I try to run observations, then I can talk to them about status and strategy.
