PSPT COMMENT: Tue Mar 31 18:07:45 GMT 1998

Today may be the day that ephemeris zero crossovers confuses the program. LowL was crashed yesterday, a situation we see near equinox. The images were dark for most of the program, dome has been erratic after a restart attempt. Working on getting the beast started again.

PSPT COMMENT: Tue Mar 31 18:47:52 GMT 1998

Images on Mag=0.25 window look very dark for most of time. 3 images that appear on IDL 0 window look OK. Spar looks well pointed and dome is in apparently good location this time.
