PSPT COMMENT: Fri Apr 10 17:56:27 GMT 1998

PSPT came up saying that there wasn't a valid ILD license and asked whether I wanted to wait for one or proceed. I opted to proceed and it indicated the machine wasn't licensed to run IDL but would run a 7 minute demo, which it did. Alerted Haosheng and he tested system and found copies of IDL running so we tried to Run again.

This time program proceeded OK.

PSPT COMMENT: Fri Apr 10 17:59:46 GMT 1998

Had to type 'exp' to get by the initial taking 3 exposures.

Clouds receded while I was checking out shutter and measuring cable lengths.

Opened up domes and restarting obs.

MKIII COMMENT: Fri Apr 10 20:31:09 GMT 1998

Tilt plate was in a little because I shut off spar power while I investigated the shutter. Moved it out.
