MKIII COMMENT: Sun May 17 22:49:26 GMT 1998

I finished the limit switch changeover for the Dark Shutter, got delayed trying to figure out how the actual circuit needed to differ from the provided schematic, but it now works and I installed the mechanism back in the MKIII. I temporarily routed the cable to the spar but will redo it when I put in the ND filter assembly cable and take out the two old cables. The ND filter Status board is in the Shutter slot for now so that we can monitor the status of the shutter, the Shutter Status board needs to be repaired. No need to exercise the shutter anymore, I hope. I'll work on the ND filter switches on the next cloudy day.

COMMENT: Sun May 17 22:55:21 GMT 1998
