PSPT COMMENT: Mon May 25 17:34:46 GMT 1998

Started PSPT using manual dome rotation. First attempt at Run failed
with Rebin error. Exited IDL and tried Run again. This time,
had to tyoe 'exp' on PC to get by 'taking 3 exposures' step, but
PSPT continued to run sucessfully after that.

Back from GONG. One of the Exabyte drives (Primary/one) was cycling between eject and load. I had much problem recovering from that failure, but eventually did and had to do a tape change on both drive banks and the tower drives.
