PSPT PROBLEM: Fri Sep 18 19:05:22 GMT 1998

1900 awakening took 13 tries before mirror settled enough to move onto 'Active mirror OK' prompt. While taking exposures mirror servo meters were visibly oscillating +/- 4 mV at a sorta choppy 1-2/sec frequency.

PSPT PROBLEM: Fri Sep 18 19:18:22 GMT 1998

Mid program, mirror is oscillating again.

PSPT PROBLEM: Fri Sep 18 19:22:28 GMT 1998

Mirror settled and program continued.

COMMENT: Fri Sep 18 19:26:13 GMT 1998

Stopping to reconfigure dome shutter.

Patrol

PSPT PROBLEM Fri Sep 18 19:37:16 GMT 1998
last images on PSPT very soft, probably due to mirror oscillation.
COMMENT: Fri Sep 18 19:59:29 GMT 1998
Network still down. Intermittently up to sites other than mainland ones.
PSPT PROBLEM Fri Sep 18 20:01:34 GMT 1998
Mirror oscillating at start of 2000 UT awakening. Swings at +/- 4 mV,
will see if it can overcome the oscillations.
Fri Sep 18 20:04:07 GMT 1998 PICS End Flat
Fri Sep 18 20:06:45 GMT 1998 CHIP End Gain

Fri Sep 18 20:08:29 GMT 1998 CHIP End Water
PSPT PROBLEM Fri Sep 18 20:11:26 GMT 1998
PSPT could not lock guider. Quit. Turned off PSPT to "rest" it.
PSPT PROBLEM Fri Sep 18 20:37:51 GMT 1998
PSPT started up again (typed Run) after a rest period.
PSPT PROBLEM Fri Sep 18 21:01:18 GMT 1998
Mirror servo meters swinging +/- 30 mV lazily at around 0.5/sec freq.
Image very soft.

Fri Sep 18 21:04:40 GMT 1998 CHIP End Water
PSPT PROBLEM Fri Sep 18 21:23:59 GMT 1998
Mirror oscillating, next Obs run would not start up. Quit.
WEATHER COMMENT: Fri Sep 18 21:25:49 GMT 1998
Passing cirrus.
PSPT PROBLEM Fri Sep 18 21:50:51 GMT 1998
Inspected Mirror servo card. Removed some corrosion between two
solder joints on underside of board near edge connector. Pair of
jumper wires soldered to U3 were heat-fused where they crossed
near the IC solderjoints. Under wire's insulation was melted thru,
couldn't see if over wire's insulation had melted. Two wires are
fairly tight, but I managed to separate them a little bit. There
is some corrosion or dry-deposition on the U4 header at pins 7 and 8.
Cleaned that off. U4 may be a point where the +/- input to the
drive amplifiers may be getting oscillated.
