WEATHER COMMENT: Thu Oct 15 16:55:06 GMT 1998

Thick dark stormclouds are moving in from the East, thunderstorms in progress on Hilo side since about 4am this morning, lots of rain down there, Floodwatch in effect. Wind=10 mph from the SSE, temp=38 F. Clouds are very tall, extending from sea level to above 14000 feet elevation, we'll probably get rain up here sometime today, observing is extremely unlikely for today.
