WEATHER COMMENT: Mon Nov 9 16:59:51 GMT 1998

Cool, in broken altocumulus clouds, system of thick high clouds may finally be breaking up, light south breeze.

GONG COMMENT: Mon Nov 9 17:34:30 GMT 1998

Going down to GONG to do PM while still in altocumulus.

WEATHER COMMENT: Mon Nov 9 17:37:01 GMT 1998

Starting instruments.

COMMENT: Mon Nov 9 17:41:50 GMT 1998

Spar seemed a bit front heavy, guider kept lagging sun when in clouds. Added a small weight to back end.

GONG terminal was dark, had to reboot Sparc to recover.

COMMENT: Mon Nov 9 18:30:55 GMT 1998

Noticed it had cleared while at

GONG. I also heard the CHIP circulator sonalert screaming.

Since I had to wait for tape spool to get to optimum range, I came back up to check spar guiding and to fill the circulator with fluid.

Started PSPT.

Returned to GONG to resume PM.
