
Mauna Loa Solar Observatory Observer's Log

Tue Dec 29 17:17:28 GMT 1998

Year: 98 Doy: 363

Observer: yasukawa

WEATHER COMMENT: Tue Dec 29 17:18:19 GMT 1998

Cool, clear, light southeast breeze.

****LOW-L PROBLEM****: Tue Dec 29 17:18:54 GMT 1998

LOWL crashed sometime over week. Date and time reading

66/66/66 66:66:66. Stopped in sync mode, Files = 84 on drive 0.

Removed L00565 from drive 0. Loaded L00566 into drive 0 and L00567 into drive 1 and rebooted PC.

Tue Dec 29 18:03:35 GMT 1998 CHIP End Water

****LOW-L PROBLEM****: Tue Dec 29 18:16:02 GMT 1998

LOWL CTS10 board finally responding. Not sure what transpired exactly. Darryl's fix of checking the ctconfig did not work. Each time I checked port, message came up that the board was not responding to that port (277) and the time/date would display some nonsense data. Last ditch effort, I sent into setup. Missed the "press key opportunity so I typed setup from dos. This is a different routine that prompts reloading of program from A: drive so I did a warm reboot to get out of it. This reboot worked and CTS10 board responded with the correct time and date.

Began LOWL observing program to L00566 in drive 0.

LOW-L COMMENT: Tue Dec 29 18:24:08 GMT 1998

During PC checkout, I cleaned the cts10 board contacts with wirebrush and alcohol. Lithium battery voltage still OK.

Tue Dec 29 18:26:20 GMT 1998 MKIII Start Cal

****PICS PROBLEM****: Tue Dec 29 18:36:59 GMT 1998

Halle temperature controller off, checking it out.

Tue Dec 29 21:03:10 GMT 1998 CHIP Water
Tue Dec 29 21:03:48 GMT 1998 CHIP End Water

PICS PROBLEM : Tue Dec 29 21:16:29 GMT 1998

Looked everywhere and could not find any unused equipment with a powerline input filter at similar specs to temporarily cannibalize.

PICS PROBLEM : Tue Dec 29 22:00:28 GMT 1998

Jury rigged a Corcom filter into the Halle temperature controller temporarily to supply unit with "filtered" power.
