LOW-L PROBLEM : Thu Feb 11 18:06:57 GMT 1999

Program was stalled, the tape L00578 was popped out of drive #0 as it should have been, but the instrument was stowed and the PC was showing the DOS prompt. I cycled the power and the computer came back up with the correct time, I guess it was stored long enough with the power off to still be there when the power came back on. I cleaned drive #0 and restarted "lowl". L00579 is in drive #0 and L00580 is in drive #1.

LOW-L COMMENT: Thu Feb 11 18:37:17 GMT 1999

At Steve's request I have changed the MOF #1 temperature setpoint to 100.0 from a previous 97.0
