PICS COMMENT: Fri Feb 26 21:20:53 GMT 1999

David and I worked on testing the new Megaplus camera.

At first we encountered problems with the software installation but got by that by deleting the folder and reinstalling the drivers and rebooting.

We got dv to work but could not get the camera command from nene to work.

Kept getting stalled at WaitCame. David is brainstorming now but needs to leave soon. If we do not come up with a solution in the next few minutes we will continue the testing on Monday. Meanwhile, the old cable that went between the old controller and the Sparcstation is the same as the 50-foot one sent by EDT so we can continue tests with the shorter cable. I will pick up a 50-foot extension cord this afternoon. The extension cord and the 50-ft. EDT cable can be routed over the weekend between the control room and the PICS. The extension cord needs to be

plugged into the unswitched computer powerstrip below nene and kii.

PICS COMMENT: Fri Feb 26 22:06:04 GMT 1999
nene was totally crashed. I assume David has left for the weekend so
I turned nene off and swapped EDT cables to the short one and turned
nene back on, rebooting it.
