PICS COMMENT: Thu Mar 4 17:25:51 GMT 1999

It looks like the Nene computer was rebooted from Boulder and that the Camera task started correctly according to the boot messages, and I found it running when I did a process list, yay!

PICS PROBLEM: Thu Mar 4 17:28:11 GMT 1999

I'm not sure if this is a problem but for the second day the tape placed in the Nene drive for data transfer to Boulder wasn't popped out of the drive in the morning. Maybe we aren't supposed to leave it in there overnight anymore? Or maybe it isn't being ejected after the data transfer?
