MKIV PROBLEM: Fri Apr 2 19:07:31 GMT 1999

Just noticed barrel is stalled at 278/279 degrees. It has not recovered after a short wait as prescribed in the manual's trouble section.

Trying a KCC reset.

MKIV PROBLEM: Fri Apr 2 19:12:52 GMT 1999

Barrel restarted after the reset. Waiting for cirrus to thin or clear before restarting Patrol.

MKIV PROBLEM: Fri Apr 2 19:16:39 GMT 1999

Judging by how the barrel rotated to initialize, the stall was likely caused the barrel rotating past the turn-around and running to the limit.

COMMENT: Fri Apr 2 19:43:27 GMT 1999

Stopping to reconfigure dome shutter.
