MKIV COMMENT: Sun Jul 4 17:46:49 GMT 1999

The tape wasn't popped out of the Nahenahe tape drive as it should be this morning, same with tape yesterday. I checked the tapes and no new data was written on them. It looks like the MkIV data is collecting in the Data directory. I'll let Alice know about this problem.

WEATHER COMMENT: Sun Jul 4 19:29:07 GMT 1999

The cirrus has gotten pretty thick and continuous already.

MKIV COMMENT: Sun Jul 4 19:30:19 GMT 1999

Pausing this due to extensive cirrostratus, no calibration yet.
