\*\*PSPT PROBLEM\*\*: Mon Sep 13 17:21:19 GMT 1999

Randy emailed to check Uniblitz shutter and replace it if it is sticking.

There is a nasty scratch on its shiny front surface, probably due to binding. Replaced it with spare.

\*\*MKIV PROBLEM\*\*: Mon Sep 13 20:00:59 GMT 1999

David's email indicates sky tx signal is more stable now so we will do some watchful waiting for a while. I pointed out that lowering the sky tx gain by reducing the light input will have the effect of increasing the spar guider gain--the sky tx signal is used as an AGC for the guider--possibly causing the guider to oscillate. might be better to try filtering the notch out.
