
Mauna Loa Solar Observatory Observer's Log

Wed Oct 6 16:59:18 GMT 1999

Year: 99 Doy: 279

Observer: koon

WEATHER COMMENT: Wed Oct 6 16:59:20 GMT 1999

Thick altocumulus clouds, wind=5 mph from the South, temp=48 F.

COMMENT: Wed Oct 6 17:00:21 GMT 1999

Will wait for clouds to clear before opening dome, etc.

COMMENT: Wed Oct 6 20:16:20 GMT 1999

The internet connection is extremely slow, I can't check my mail sometimes.

MKIV COMMENT: Wed Oct 6 22:26:32 GMT 1999

I removed some old MKIII stuff from the spar and did some rebalancing,
but a major rebalance is needed and I'll have to continue this tomorrow.

LOW-L PROBLEM: Wed Oct 6 22:40:31 GMT 1999

The clock was off, it was 1 day and 1 minute ahead. I stopped the program
and removed L00632 from drive #1 and installed L00634 there. Then reset
the time and date and restarted the program with data going to L00633
in drive #0. I noticed it was off earlier this morning but didn't
stop it right away because it was cloudy and I wanted to work on a few
other things first, so I watched to see if it would correct itself but
it didn't. I wanted to check some of the software before starting a new
tape but didn't get to that due to other work, so I just restarted it
as described above.

COMMENT: Wed Oct 6 22:52:19 GMT 1999

TAPES:

CLOUDY

LOWL: L00632 in drive #1 and L00633 in drive #0

Wed Oct 6 22:53:14 GMT 1999
