MLSO PROBLEM Wed Feb 2 19:47:37 GMT 2000

I checked out the UPS and it all tested OK, I called APC and they verified that the battery charger should be OK, it must have been a communications glitch that caused a bad self-test yesterday. If it fails a self test next time (2 weeks from yesterday?) then we need to call them for a possible new EU replacement. I'm not sure why a self test happened yesterday, it was set to every 2 weeks and I assume 2 weeks from when I replaced the EU (1/27 replaced) would be the first self test (at 2/10). But maybe that test was from the original setup.
