No observing until clouds clear away.

\*\*PSPT PROBLEM\*\* Sun Mar 26 23:30:10 GMT 2000

The shutter has been getting noisier lately, as we open and close it. I  
traced the problem to a roller, loosened the bearings and tried to get  
grease into the bearings. I couldn't remove it and it is not a safe  
procedure even if it were removeable, as far as I can tell. It is  
greatly improved but not good as new.

WEATHER COMMENT: Sun Mar 26 23:32:55 GMT 2000

No observing due to clouds.
