LOW-L PROBLEM : Thu Apr 20 20:07:40 GMT 2000

Changed MOF2 setpoint from 138.0 to 140.0 at Steve's request. This must be done outside after accessing the MOF2 temperature controller by removing the larger West-side electronics bay (lower bay) door. I had tried to change this a few weeks ago using the old method which only changed the setpoint value shown on the observing screen.

WEATHER COMMENT: Thu Apr 20 21:18:20 GMT 2000

Clouds getting thicker, losing tracking, closing down.
