MKIV PROBLEM: Sun Jun 4 16:53:18 GMT 2000

No data tape made due to mysterious Nahenahe reboot.

MKIV PROBLEM: Sun Jun 4 17:52:24 GMT 2000

I tried Andrew's procedure for writing data to tape manually, from March when I had this problem last, it didn't work, I couldn't find data where he said it would be and there wasn't any script file for writing either, probably because this is a different kind of tape write failure. Back then I had asked several people if there was a way to accumulate data when this kind of problem happens, but I didn't get a direct answer to this, so I'll hope the data is safe and email Andrew again about this.
