**** EVENT COMMENT ****: Tue Jun   6 18:23:27 GMT 2000
brightness changes observed in streamer on southeast limb give the
effect of outward movement, possible CME?
**** EVENT COMMENT ****: Tue Jun   6 19:03:47 GMT 2000
Brightness in the southeast streamer not changing in the latest xanim
series, no apparent changes or outward motion seen.

LOW-L COMMENT: Tue Jun   6 22:11:03 GMT 2000
Since we will be normally taking data on tape drive #0 unless we
encounter an unusual situation,  I think there will be no more
need to indicate "in drive #0" when listing tapes anymore, until
we get a working drive #1.
