Problem with new script changes.  Alice modified to fix, restarting now, doing
a Kill/Run cycle to restart.

A NEW TAPE HAS BEEN PUT INTO KAIEE DLT DRIVE, Wed Oct 11 19:37:32 GMT 2000
COMMENT: Wed Oct 11 19:38:45 GMT 2000
I've created a new log comment called nt.  We use nt to enter a consistent
log comment that the Kaiee DLT tape has been swapped with a new one.  That way
Alice's script can check if that happened before writing to the DLT drive
and therefore won't overwrite a full tape that might be there if we weren't
here to swap tapes.  The comment can be seen above this comment.
