MLSO PROBLEM: Fri Oct 20 16:49:12 GMT 2000

Swapped older replacement monitor back to kaiee, removed newer replacement monitor. Newer one does not work at all, stays in power saving mode all the time. Older one works most of the time. Screen is tearing up, horizontal sync is flaky at startup (warm-up?). After around a minute, severe tearing stopped, monitor remains in active mode (power saving led not on), but display is flashing on and off, still some tearing at edge of login graphic.

MLSO PROBLEM: Fri Oct 20 17:19:29 GMT 2000

kaiee monitor display finally settled down.
