PSPT COMMENT: Wed Nov 15 18:34:49 GMT 2000

Will try running this today without turning on the camera chiller. The chiller has a leaking pump and this type of chiller has been known to cause leaks at the camera also, which could ruin the camera. So it is hoped we can run without using the chiller and buying a new pump housing and risking the camera. I'll keep an eye on the images. For Boulder data analysts, please see if you like the data.
