Clear sky, wind=5 mph from the South, temp=38 F.

COMMENT: Thu Nov 30 17:45:44 GMT 2000

Tony is up here with me today. I forgot to type "Run" into the console window until a few minutes ago, after the instruments were already started, so the start time on this log is funny.

****MLSO PROBLEM****: Thu Nov 30 17:47:20 GMT 2000

There is no display on the cooling unit upstairs in the dome, but it is running, the CHIP plate temp is low and out of range. I will look into this.

****MLSO PROBLEM****: Thu Nov 30 17:48:34 GMT 2000

Didn't get up here to observe yesterday because I had to get the GSA car worked on. I found out in the morning that the brakes were worn out.

****MLSO PROBLEM****: Thu Nov 30 20:57:46 GMT 2000

I'm having some problems responding to my email because the new PC has been installed before I could set it up with my mail program and preferences.

Thu Nov 30 21:18:26 GMT 2000 PICS End Patrol

Thu Nov 30 21:21:59 GMT 2000 CHIP End Patrol

****MLSO PROBLEM****: Thu Nov 30 21:13:52 GMT 2000

New temperature controller is what we need for the cooler upstairs. Will send out email regarding this to Greg and Ron and David and Kim. Tek-Temp company says not to run the cooler until the controller is replaced.

Unfortunately it takes about 1 to 2 weeks to get a new one so CHIP and PICS may be down until then.

Thu Nov 30 22:51:31 GMT 2000 CHIP FrontEnd finished.

****MLSO PROBLEM****: Thu Nov 30 22:52:06 GMT 2000

I think I got to most of my high priority email messages, if I didn't reply to someone then I'll get back to them on Saturday, hopefully I can concentrate on setting up my email program and other program on the new PC over the weekend, it looks like a good PC!
