In thin cirrus again.

\*\*CHIP PROBLEM\*\*: Mon Dec 4 21:20:03 GMT 2000

CHIP plate temp. is now 17.405, still in red. Lamp may not be that

helpful in bringing temperature into range any faster than yesterday without the lamp.

We will leave a space heater on in the dome overnight to see if that would help keep the plate from cooling down too much.

Mon Dec 4 22:04:49 GMT 2000 CHIP End Patrol

Mon Dec 4 22:05:29 GMT 2000 PICS End Patrol

\*\*CHIP PROBLEM\*\*: Mon Dec 4 22:07:16 GMT 2000

CHIP plate never reached temperature, CHIP Filter temperature went thru its operating temperature and is at 35.423 (red)
