WEATHER COMMENT: Fri Jan 5 21:15:59 GMT 2001

Sky not so bright now.

Fri Jan 5 22:05:18 GMT 2001 PICS End Patrol

CHIP PROBLEM: Fri Jan 5 22:10:21 GMT 2001

Program stalling at WaitOpti this last loop. Keep Cancelling and it goes on and stalls at next Wait. This was after trying to End Patrol during FixCenter but missed something as it continued with next loop. Killing to end Patrol.

PSPT COMMENT: Fri Jan 5 22:19:47 GMT 2001

Started PSPT back up at around 2115 or so and took some data until 2200.

Pspt came back up ok with the usual funnies--the need to type 'exp' on PC to get by a stall in the "taking 3 exposures" step that always occurs on all subsequent start-up during any one day.
