WEATHER COMMENT: Mon Apr 2 17:02:31 GMT 2001  
Cool, in cirrus and altocumulus overcast, brisk south wind.  
GONG COMMENT: Mon Apr 2 17:03:06 GMT 2001  
Performed weekly and monthly preventive maintenance before coming  
up to observatory since we are in heavy overcast and there is no  
rush to start up MLSO instrumentation.

\*\*MLSO PROBLEM\*\*: Mon Apr 2 22:35:34 GMT 2001  
Did the network changeover today. All systems are now on mlso.ucar.edu  
now. All systems except nene have been checked out--albeit there is no  
sunshine here today. David is currently troubleshooting nene to see why  
the diskwrite is not happening.

\*\*PICS PROBLEM\*\*: Mon Apr 2 23:20:20 GMT 2001  
PICS was not running the camera task. It ran when David started up a  
Camera task remotely. The plan is for me to reboot nene to spawn the  
camera task and we will check it out tomorrow.
