MLSO PROBLEM: Wed Oct 10 21:11:38 GMT 2001

I just got through with a long problem with Nahenahe. It crashed this morning with SCSI error messages. It could have been a problem with the "e" hard-drive because I could see that it wasn't mounted after I stopped the message scrolling and logged in as root and looked around. Then there was a problem with /var that required running "fsck", I wrote to "trouble" and asked for help with "fsck". Vic called and help me with that. Then I got a successful boot using "reboot" as superuser. So there is an intermittent problem.

MKIV COMMENT: Wed Oct 10 21:29:49 GMT 2001

Finally got this going again.
