
Mauna Loa Solar Observatory Observer's Log

Mon Jan 28 17:25:11 GMT 2002

Year: 02 Doy: 028

Observer: yasukawa

WEATHER COMMENT: Mon Jan 28 17:25:29 GMT 2002

In thick altocumulus overcast, cool, no wind.

ECHO PROBLEM : Mon Jan 28 17:53:32 GMT 2002

Jonathan indicated that ECHO was still down after the power outage.

Instrument appears to be working except that there are no images due to the overcast and there were 3 ftp errors reported on the gui. I did a partial shutdown to reboot the PC to reset things. I am currently waiting for the GPS to acquire the time before starting the observing program.

WEATHER COMMENT: Mon Jan 28 18:48:24 GMT 2002

Hole in altocumulus may be approaching, opened up the domes, standing by.

ECHO PROBLEM : Mon Jan 28 18:52:06 GMT 2002

ECHO GPS acquired and set time. Started Observing program.

WEATHER COMMENT: Mon Jan 28 19:02:59 GMT 2002

Hole closed up.

COMMENT: Mon Jan 28 19:22:35 GMT 2002

Closed domes again to protect instruments from potential moisture.

Mon Jan 28 21:06:25 GMT 2002
