Year: 02 Doy: 029

Observer: yasukawa

WEATHER COMMENT: Tue Jan 29 18:10:13 GMT 2002

Cool, in heavy overcast, heavy rain and strong south wind.

old/new control room transition leaking in all the usual places, although not as much water on the floor as the last storm. I will spend the morning mopping up and placing buckets under the main drips.

**\*\*GONG PROBLEM\*\***: Tue Jan 29 18:12:14 GMT 2002

Stopped by GONG on the way up, put on foul weather gear, and stowed and bagged the turret. Also did the weekly preventive maintenance.

COMMENT: Tue Jan 29 18:52:34 GMT 2002

Dome is OK, no leaks.
