PSPT PROBLEM: Fri Feb 15 20:14:33 GMT 2002

at 2003, I noticed that the PC had funny graphics characters on it and was

stalled. There was a character that looked like a rectangle with a heart and two dots on it, a male symbol, and a pair of 1/8th notes (musical) with the characters n and p following it. The pspt appeared to be attempting centering and was reporting that the sun was still too low" " go back to bed". Aborted the program and it reported "Aborting Flat field sequence" Exited gui and restarted Pspt. Reset PC as it was stalled. Did Init sys. Program restarted but ephemeris was corrupted, dome ran to wrong position. Repositioned spar and dome, did a kill/Run cycle, and restarted Pspt with a Start-up command.
