COMMENT: Sun Jun 9 19:38:16 GMT 2002

Extended the dome slot.

PSPT PROBLEM: Sun Jun 9 21:32:25 GMT 2002

Crashed at 2105 UT. Last GUI message was "Taking CaK image". Checked PC with "whereis ftr" command and it showed the correct position for the CaK filter, at 14200. Checked filter wheel position and it was at the CaK position. This is an infrequent problem that may be related to the DSP controller for the filter wheel according to an old message from Haosheng.

I killed runPspt.pro (kill -9 runPspt.pro on an xterm window), then run Pspt again on the Sparcstation and then select Data/Daily Obs.

WEATHER COMMENT: Sun Jun 9 21:47:30 GMT 2002

Orographic clouds are moving in, pausing some instruments.
