PSPT COMMENT: Sat Aug 24 20:20:22 GMT 2002

Alice turned back on a routine that was commented out that will turn off the guider and active mirror during low QCsum readings (e.g., clouds), there are thick clouds now but the telescope continues to guide and take data with the guider servo and active mirror off - yay! It's a mystery why this great routine was shutoff all this time.

WEATHER COMMENT: Sat Aug 24 20:23:43 GMT 2002

Paused instruments due to thick clouds.

PSPT COMMENT: Sat Aug 24 20:49:00 GMT 2002

stopping pspt for code mods.

ECHO COMMENT: Sat Aug 24 20:50:33 GMT 2002

Alice accidentally stopeed and restarted echo around 20:06 ut. Was very cloudy at this time, so hopefully no loss of data.

WEATHER COMMENT: Sat Aug 24 22:11:09 GMT 2002

Still have thick clouds and fog is starting to approach.

Sat Aug 24 22:11:46 GMT 2002
