Observer: koon

WEATHER COMMENT: Thu Sep 5 16:47:11 GMT 2002

Thick overcast, no wind, temp=42 F.

COMMENT: Thu Sep 5 16:47:47 GMT 2002

Will wait for clouds to clear before starting observations.

\*\*GONG PROBLEM\*\* : Thu Sep 5 22:33:08 GMT 2002

I tried installing the new media converters. It should have worked with only one installed at the shelter, but didn't. The new converter is still installed at the shelter. I tried with and without a new converter up here, using different ports on the switch, but neither way worked. It didn't work with the borrowed media conveter setup that was already being used at MLSO, with the new converter at the shelter side. I tried the successful Groundwinds 100base-FX port for our setup but it didn't work. I tried moving Groundwinds to a old and new converters connected to 10base-T/100base-TX ports and that wouldn't work either. Will have to think about this more and try again on Saturday.

WEATHER COMMENT: Thu Sep 5 23:01:20 GMT 2002

Very cloudy all day, spar couldn't track, no data.
