MLSO PROBLEM : Thu Nov 14 17:50:13 GMT 2002

The monitor for the MCC GUI hasn't been coming up properly since yesterday, it won't display and the "power saving" LED keeps blinking. This is the typical way that many of these monitors have died over the years. We need a new monitor. I tested the LCD monitor for Hoiike and that works well, I've left the spare ECHO monitor connected for now, it displays a double image but that is better than nothing. Will request a new monitor from Boulder.

GONG PROBLEM : Thu Nov 14 19:16:37 GMT 2002
 Still working on their network problem. It is easier to do this now that they are up here because I don't have to walk up and down between the shelter and here with each of the many combinations of tests - like I did a while ago.
