CHIP PROBLEM: Fri Jan 10 20:32:37 GMT 2003

CHIP appears to have crashed at 1849 UT doing FixCenter at the time.

Restarting.

CHIP PROBLEM: Fri Jan 10 20:35:06 GMT 2003

Timing of crash tells me that something I typed on the kii keyboard when trying to do things on hoike may have caused the crash. This is a common error--hoike keyboard is nearby, but inconveniently located and I've found myself entering hoike commands on kii several times before.

Unfortunately, this time the cursor must have been in an xterm or cmdtool window rather than in a don't-care location.
